EXECUTIVE SUMMARY

In calendar year 2024, New Hampshire's cities and towns issued **building permits for the construction of 5,822 housing units**, the highest annual number since 2006. Assuming all permitted units were constructed in 2025, New Hampshire has **added 25,688 housing units since 2020**, or 78.5% of the amount called for by the New Hampshire Statewide Housing Needs Assessment for that period. The total number of housing units in the state as of July 1, 2025, is estimated to be 664,039.

Housing units in multi-unit buildings represented 62% of units added in 2025, the highest percentage recorded since the housing survey was initiated over 50 years ago. Single-family housing represented 35.6%, with manufactured housing representing the remaining 2.4%. The number of single-family units permitted statewide has declined every year since 2020, when they represented 59.2% of all units built.

Housing production in the state is geographically narrow, with a small group of high-growth towns bearing the brunt of new development . 23 communities, representing 43.5% of the state's population, accounted for 63% of the housing built in 2025. 28 cities and towns in the state are designated Housing Champions communities and were responsible for approving 45% of housing units that were built in 2025.

Detailed tables of permits approved by municipality, county, and statewide are available as appendices to the report.

New Hampshire's Housing Supply: Current Estimates and Trends

New Hampshire has added over 25,000 housing units since the 2020 census.

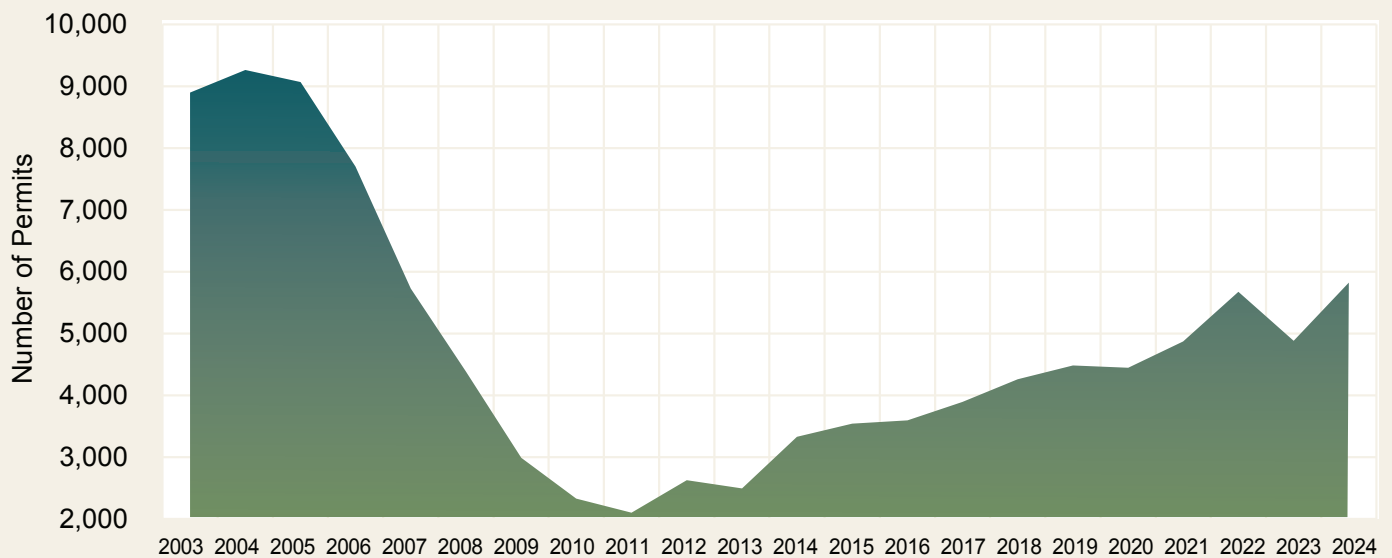

New Hampshire Housing's 2023 Statewide Housing Needs Assessment called for 32,704 housing units to be added between 2020 and 2025 to reach a balanced market by 2040. The state has added an estimated 25,688 units since 2020, representing 78.5% of the 2025 goal.

According to the 2023 assessment, the state needs a total of 88,364 units by 2040. This means the state needs 62,676 more units to meet the total 2040 goal. The state is 29% of the way to the total 2040 goal.

The graph below shows building permits issued since 2003, indicating a general rise in the number of units added since 2011.

NET ANNUAL INCREASE IN HOUSING UNITS IN NEW HAMPSHIRE, 2003-2024

Based on Building Permits Issued

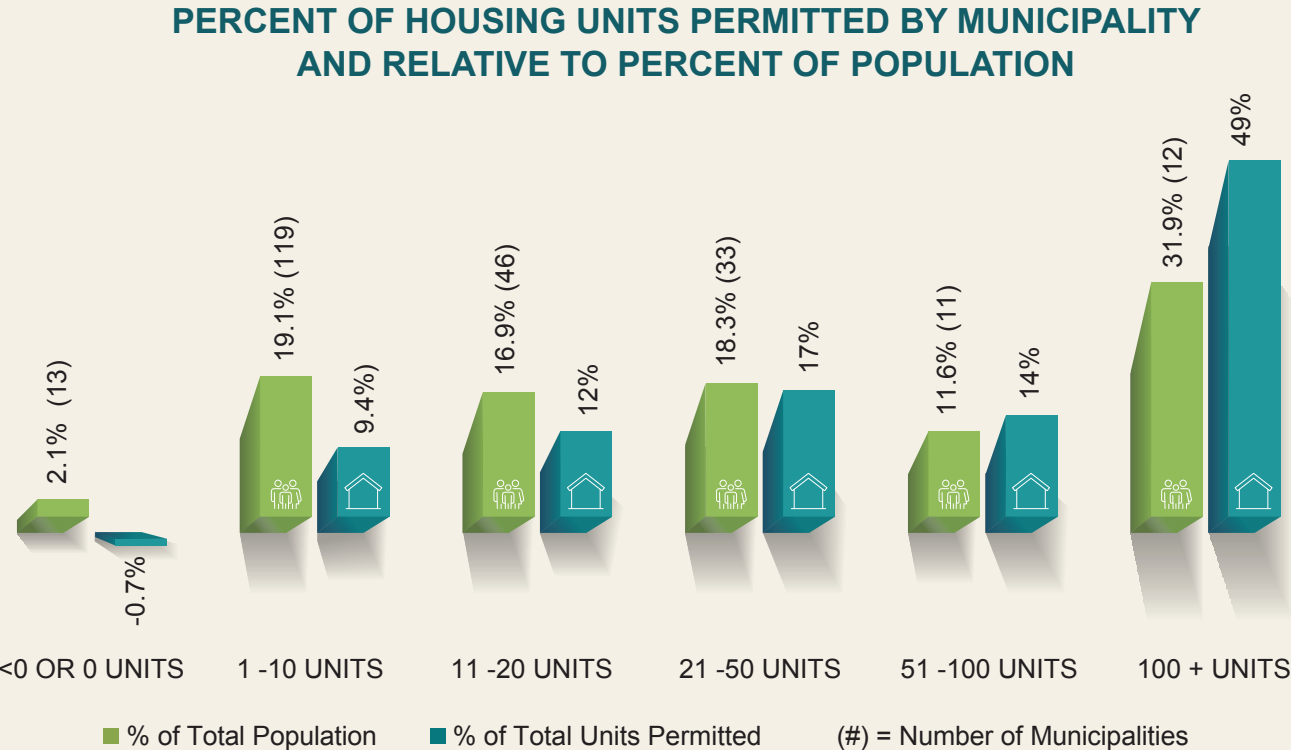

After a dip in 2023, New Hampshire communities permitted 5,822 housing units in 2024, slightly higher than in 2022 and the highest overall since 2006, when 7,702 units were permitted. The resulting total number of housing units in the state as of July 1, 2025, was 664,039, assuming all units permitted in 2024 were built.

The graph below illustrates the share of housing units permitted by communities relative to their share of the state's total population. For instance, 12 communities permitted 100 or more units in 2024, the same as the previous year. These 12 communities represent 31.9% of the state's population and permitted 49% of the units. By comparison, 132 communities permitted 10 or fewer units, including 13 that lost or produced no new units. These 132 communities represent 21% of the state's population and permitted 8.7% of the units. The data demonstrates that fewer dense urban centers produce the largest share of housing in the state.

As of 2025, 28 cities and towns were designated Housing Champions. These communities qualified due to the adoption of zoning and land use regulations that promote housing and also offering training resources to land use board members. Additionally, they have implemented, or plan to implement, sewer and water improvements and public transportation or walkability improvements to support housing.

The 28 Housing Champion communities were responsible for approving 2,643 housing units, or 45% of the total number of units approved in the state in 2024. They include Boscawen (35), Concord (147), Derry (155), Dover (500), Enfield (9), Exeter (13), Farmington (11), Gorham (-3), Hampton (17), Hillsborough (18), Hinsdale (6), Hooksett (30), Jaffrey (15), Keene (15), Lebanon (218), Lincoln (32), Manchester (364), Meredith (33), Nashua (159), New London (5), Newmarket (74), Newport (26), Plymouth (26), Portsmouth (249), Rochester (266), Rye (23), Salem (40), and Somersworth (160).

Statewide, single-family home permits decreased from 2,239 in 2023 to 2,074 in 2024, and the percentage of single-family home permits relative to total permits decreased from 45.9% of the total in 2023 to 35.6% in 2024. Overall, the number of single-family permits issued has declined statewide every year since 2020, when the percentage of single-family permits was 59.2%. Similar to past years, manufactured housing units represented only 1.9% of the permits in 2024.

Permits for units in multi-unit buildings increased from 2,511 in 2023 to 3,635 in 2024. Units in multi-unit buildings made up 62% of the total number of units added in 2024, the highest percentage since this survey was initiated.

The sharp increase in the number of permits issued for units in multi-unit buildings is likely attributable to the Invest NH program, which awarded funds primarily for new housing units in multi-unit buildings. The InvestNH program has increased the housing supply by 4,721 units statewide to date.

Additional units are also in the pipeline from Invest NH that have received approvals but not been constructed due to factors such as municipal infrastructure and site condition delays. These will likely be counted toward next year’s survey results.

The table below shows the number of units permitted in each region of the state, compared with the results of the Regional Housing Needs Assessments, published in spring 2023.

REGION '20 – '24 HOUSING UNITS PERMITTED*		'20 – '24 YEAR-ROUND HOUSING UNITS NEEDED
1,822	Central New Hampshire Regional Planning Commission	3,028
2,629	Lakes Region Planning Commission	2,815
3,927	Nashua Regional Planning Commission	5,143
2,202	North Country Council	1,782
3,839	Rockingham Planning Commission	5,352
4,405	Southern New Hampshire Planning Commission	7,212
1,241	Southwest Region Planning Commission	1,873
3,406	Strafford Regional Planning Commission	3,289
2,217	Upper Valley Lake Sunapee Regional Planning Commission	2,210
25,688	NEW HAMPSHIRE	32,704

*including seasonal units

As indicated above, the regions represented by the North Country Council, Strafford RPC, and Upper Valley Lake Sunapee RPC Assessments exceeded production of the number of housing units needed between 2020 and 2024. Conversely, despite the high number of units permitted each year in communities represented by the Southern New Hampshire and Central New Hampshire RPC Assessments, those regions produced only slightly more than half the number of units needed there.

It is important to clarify that the Regional Housing Needs Assessments are projecting the number of housing units needed and available for year-round occupancy; however, this report does not distinguish between permitting for year-round versus seasonal occupancy or short-term rentals. As a result of seasonal or short-term rental units, some regions may be further from their 2025 housing unit goal than indicated in the above table.

Geographic Patterns

Maps 1-11 depict the number of units permitted by county, state, and region for 2024. Map 1 illustrates the number and proportion of building permits issued by county. The highest number of single-family permits were in Rockingham (507) and Hillsborough (306) counties, with Carroll (232), Grafton (230), and Merrimack (222) counties rounding out the top 5. Hillsborough County had the highest number of units in multi-unit buildings permitted, at 1,032, followed by Rockingham (954), Strafford (859), Grafton (342), and Merrimack (316). The remaining five counties permitted fewer than 100 units each.

Housing growth by county in 2024 showed a few differences from previous years. In five counties (Cheshire, Grafton, Merrimack, Rockingham, and Strafford), more permits were issued for units in multi-unit buildings in 2024 than in the previous year. Two of those counties (Rockingham and Strafford) saw the number of units permitted more than triple. While five counties (Carroll, Cheshire, Merrimack, Strafford, and Sullivan) saw an increase in the number of single-family permits from the previous year, the growth in those counties was offset by a drop in the number of single-family permits in the other five counties.

At the community level, 55 cities and towns across New Hampshire issued permits that added approximately 1% to their single-family housing stock of the previous year, and up from 49 communities in 2023. Epping issued the largest number of permits for single-family homes in the state with 76 in 2024, similar to the 79 permits they issued in 2023.

78 cities and towns issued permits for units in multi-unit buildings that added more than 1% to their existing multi-unit total, up from 62 in 2023. Six communities issued permits for more than 200 units in multi-unit buildings in 2024:

Dover	456 units
Manchester	345
Londonderry	332
Rochester	232
Lebanon	210
Portsmouth	206

About the data and this series

This report is one in a series of reports published as *Current Estimates and Trends in New Hampshire's Housing Supply*, last published in February 2025. The State Data Center at OPD and its predecessors have been issuing this series of reports since the mid-1970s. The reports present data that show short- and long-term trends in housing construction and total housing supply.

The building permit data in this report update the 2020 Census and American Community Survey data and are collected via an annual survey of municipalities. Thanks to the efforts of municipalities statewide, the survey enjoys a 100 percent response rate. OPD devotes considerable time checking and refining survey returns to ensure as much consistency as practical. OPD does not conduct any field checks as part of the quality control process and relies upon municipal responses for accuracy.

The *Housing Supply* series is intended to present the latest annual trends based on reported building permit activity. Data users interested in long-term housing trends (which may span two or three decades) are urged to analyze patterns shown by combining decennial census years with mid-decade permit data. Year-to-year comparisons that mix permits and census years are not valid.

Definition change

To the extent possible, the figures contained herein represent total housing units. In prior years (pre-1990), our data represented only year-round housing units. From 1990 on, the data do not distinguish between year-round and seasonal units, because virtually all homes were built with similar construction characteristics. All units are included in the census and permit data. Some housing units have all the characteristics of year-round units but are in fact used on a seasonal or leisure-time basis.

The data user should remember that the decennial census is essentially a questionnaire asking persons to respond. It is not a detailed field survey of characteristics of housing units. The census effort is not aimed at quantifying or analyzing the seasonal or leisure home sector. Nevertheless, this sector does have an impact on the year-round data.

The problem of distinguishing between seasonal and year-round units also applies to the permit data. Building permits usually do not request information regarding intended use. For this reason, all permits issued for new dwellings are included in this report.

Data limitations

Accounting for conversions is another difficulty in compiling housing supply data. Conversions may increase or decrease the total housing stock. There are many types of conversions: for example, a dwelling could be converted to an office, a single-family home may be converted to two or more dwelling units, or an accessory dwelling unit may be added. Many municipal permit systems are not adept at tabulating the pluses and minuses in dwelling units due to conversions. The same is true of demolitions. Often, a demolition permit does not require reporting the number of dwelling units involved.

The categorizing of row- or townhouses, often referred to as condominiums, is difficult. In the past, local officials were asked to report them under the single-family category. Nevertheless, this structure type has caused confusion among some local officials. Beginning with the 1990 report, any structure that is attached is reported as multi-family. This includes condominium units as well as structures that may have been single-family houses but now have accessory dwelling units.

Building permits are typically valid for one year. Some permits never result in actual construction and the permit expires. Starting in 1990, OPD requested each municipality to report any expired permits from the previous year. These figures show the number of structures and units not completed due to the expiration of the building permit or change in plans by the builder. Without this information, there is a possibility of double counting if a permit is re-issued. When expired permits are reported, OPD reduces the number of permits reported in the prior year.
