

**9) Small group bands are allowed to perform outside only, as long as they can maintain physical of 6 feet apart from each other and any table. No bands are allowed to perform indoors at restaurants or function halls.**

**Proposed:**

**9) Live Entertainment (Karaoke, Open Mic, Music Groups) allowed:**

**Guidance For all live entertainment in a restaurant or bar setting covering Solo/Duo and small band performances:**

- a) The establishment hosting the event must designate an area where the artists / Patrons will perform. If there is no delineated stage then the area must be clearly defined in some manner as determined by the establishment (tape, painted lines, barriers, etc.)
- b) The Karaoke provider/Open Mic Host must wear a cloth face covering at all times when assisting participants in the setup of the microphone, mic stand, stools, etc. The Karaoke provider / Host are allowed to remain on stage during the participant's performance in order to operate their system if needed.
- c) Patron Participants are only allowed to be on stage individually other than if performing with the host/house band. There will be no instances of two more audience participants performing at a time. If a participant is singing while the host/house band plays, the participant must be set 6 feet from the host/house band, and 8 feet from any Patron.
- d) All participants/performers need to use their own a microphone which has been disinfected prior to its use. Sharing of microphones are not allowed. That same microphone may not be used by any other singer until it has been sanitized/cleaned per the CDC guidance for cleaning and disinfection.

Suggested methods are:

1. Establishments own several microphones which they provide the participants to use. After wach use the establishment is to assure that the screen, foam liner under the screen, and all exterior parts are disinfected under the CDC guidance for cleaning and disinfection guidelines.

2. Establishments require participants to bring their own microphone (microphones can be made available for sale to participants by the establishment or Karaoke Provider/Open Mic host at the event directly).
3. Microphones can be covered with a protective cover which will be removed after each use and replaced with a new cover by the Karaoke Provider. This method requires that the person switching these covers has fresh gloves or has properly sanitized their hands first.

e) All items that can possibly be touched by a participant, or exposed to droplets, must be disinfected prior to the next participant coming onto stage, e.g., microphone cords, microphone stands, stools, etc. It is acceptable to have multiples of these items and switch them with each new participant. During a participant's performance the previous set of equipment can be disinfected.

f) Participants who sing or play a wind instrument, (including harmonica) must maintain a physical distance of 8 feet from any patron at all times while performing.

g) Participants must don a cloth face covering immediately before leaving the stage area.

h) Subsequent participants must wait until the previous participant has left the stage/stage area before going onto the stage. They must keep a cloth face covering on until they have actually stepped onto/into the stage area.
