In an effort to swiftly obtain necessary commodities in this time of emergency, the State offers the following historical data for the consideration of vendors and prospective vendors. The following prices reflect the approximate price the State of New Hampshire has, in the relatively recent past, paid for the items and commodities. The prices noted here serve as guidance only and do not represent the minimum or maximum amounts that the State will pay for these commodities at this time. State procurement is generally based upon principles of competitive bidding, whereby the State endeavors to obtain commodities that meet specifications as to quality, quantity, delivery date and other factors at the lowest cost to the citizens of this State.
